Title: Nonexistence of linear operators extending Lipschitz (pseudo)metrics

Author(s): Dušan Repovš and Michael Zarichnyi

We present an example of a zero-dimensional compact metric space $X$ and its closed subspace $A$ such that there is no continuous linear extension operator for the Lipschitz pseudometrics on $A$ to the Lipschitz pseudometrics on $X$. The construction is based on results of A. Brudnyi and Yu. Brudnyi concerning linear extension operators for Lipschitz functions.
