**Title:** Warped product pointwise bi-slant submanifolds of Kaehler manifolds

**Author(s):** Bang-Yen Chen and Siraj Uddin

Warped product manifolds have been studied for a long period of time. In contrast, the study of warped product submanifolds from extrinsic point of view was initiated by the first author around the beginning of this century in [7], [8]. Since then, the study of warped product submanifolds has been investigated by many geometers.

The notion of slant submanifolds of almost Hermitian manifolds was introduced in [5]. Bi-slant submanifolds in almost contact metric manifolds were defined in [4] by J. L. CABRERIZO *et al.* In [26], we studied bi-slant submanifolds and warped product bi-slant submanifolds in Kaehler manifolds. In this article, we investigate warped product pointwise bi-slant submanifolds of Kaehler manifolds. Our main results extend several important results on warped product slant submanifolds obtained in [7], [21–23], [27].
