

Approximation by matrix transform means with respect to the Walsh system in Lebesgue spaces

By ISTVÁN BLAHOTA (Nyíregyháza) and DÓRA NAGY (Nyíregyháza)

Abstract. In this paper, we improve, complement and generalize (from Nörlund to matrix transform means) a result of Móricz and Siddiqi [26] and some statements of Areshidze and Tephnadze [3], and (from T (weighted) to matrix transform means) Anakidze et al. [2].
