Title: On the maximal and minimal exponent of the prime power divisors of integers

Author(s): Imre Kátai and M. V. Subbarao

For some integer n and prime p let $\nu_p(n)$ be the largest nonnegative integer for which $p^{\nu_p(n)}$ is a divisor of n . Let $h(n) = \min_{p|n} \nu_p(n)$, $H(n) = \max_{p|n} \nu_p(n)$. The mean value of h , H over some subsets of integers is investigated.
