Title: On additive maps of prime rings, II

Author(s): Matej Brešar and Bojan Hvala

Let R be a prime ring. The problem of describing the form of additive maps $f_1, \dots, f_n : R \rightarrow R$ satisfying $f_1(x)x^{n-1} + xf_2(x)x^{n-2} + \dots + x^{n-1}f_n(x) = 0$ for all $x \in R$ is discussed.
