

**Title:** A uniqueness theorem for meromorphic maps with moving hypersurfaces

**Author(s):** Gerd Dethloff and Tran Van Tan

In this paper, we establish a uniqueness theorem for algebraically nondegenerate meromorphic maps of  $m$  into  $P^n$  and slowly moving hypersurfaces  $Q_j \subset P^n$ ,  $j = 1, \dots, q$  in (weakly) general position, where  $q$  depends effectively on  $n$  and on the degrees  $d_j$  of the hypersurfaces  $Q_j$ .
