**Title:** Nonexistence of linear operators extending Lipschitz (pseudo)metrics

**Author(s):** Dušan Repovš and Michael Zarichnyi

We present an example of a zero-dimensional compact metric space  $X$  and its closed subspace  $A$  such that there is no continuous linear extension operator for the Lipschitz pseudometrics on  $A$  to the Lipschitz pseudometrics on  $X$ . The construction is based on results of A. Brudnyi and Yu. Brudnyi concerning linear extension operators for Lipschitz functions.
