Title: Conformal vector fields on a locally projectively flat Randers manifold

Author(s): Zhongmin Shen and Qiaoling Xia

We study and characterize conformal vector fields on a Randers manifold of projectively isotropic flag curvature. In particular, we prove that any conformal vector field on a non-Riemannian locally projectively flat Randers manifold of dimension $n \geq 3$ must be homothetic and completely determine conformal vector fields on a locally projectively flat Randers manifold.
