Title: Spherically symmetric Finsler metrics with constant Ricci and flag curvature

Author(s): Esra Sengelen Sevim, Zhongmin Shen and Semail Ülgen

Spherically symmetric metrics form a rich and important class of metrics. Many well-known Finsler metrics of constant flag curvature can be locally expressed as a spherically symmetric metric on R^n. In this paper, we study spherically symmetric metrics with constant Ricci curvature (tensor) and constant flag curvature.
