**Title:** Asymptotic behavior of solutions to neutral functional differential equations with infinite delay

**Author(s):** Yong-Kui Chang and Xiao-Xia Luo

In this paper, we first introduce some classes of  $\mu$ -pseudo almost automorphic type functions and establish some properties of such functions. And then, we apply the obtained results to investigate the existence of  $\mu$ -pseudo almost automorphic solutions to a first-order partial neutral functional differential equation with infinite delay.
